The flexibility of Fresh Start Purging Compounds allows users to replace a number of formulas/grades typically used for a specific application. This feature could reduce inventory, purchasing costs, and accidental misuse. Unlike other purging compounds, Fresh Start requires zero soak time for the chemical reactions to take place. Other purging formula brands require the temp to be raised to get the best performance out of the purge.

Reduce machine downtime when changing materials and or colours by using DME Tuff-Scrub™ Purging Compound. Tuff-Scrub™ requires no carrier material and will remove all traces of the previous mix, including degraded material from the screw, barrel and nozzle. Perfect for purging polycarbonates, polyesters, nylon and other engineering resins, but also works well on all thermoplastics.
